# KHOI NGUYEN

**FULL STACK ENGINEER**

## About me

As a full-stack developer, I bring strong technical skills, a Can-Do mindset, and a user-oriented approach. I not only code but also find practical solutions through critical thinking.

Main-tech: Node, React, Symfony

## Projects

### Medical tracking web app  |  Remote
01/2021 - 02/2022 (1 year 1 month)

Descriptions:
- Web application for stroke patients and doctors.

Technologies:
- NodeJS, Express, GraphQL - Apollo, React, Redux, Tailwind, MongoDB, MQTT broker, Jenkins.

Responsibilities:
- Design solutions and implement them on both FE and BE sides.
- Convert client's idea to product.
- Providing guidance to clients, articulating solutions, and recommending best practices.
- CI/CD using Jenkins.
- Redesign the whole website.

### Physiotherapy medical web app  |  Remote
11/2021 - 04/2022 (5 months)

Descriptions:
- Single Page Application for tracking medical records, controlling medical devices, and supporting restore function physiotherapy for patients.

Technologies:
- Nodejs, Express, React, Tailwind, ORM, MQTT broker, MongoDB, API.

Responsibilities:
- Redesign the whole website with animation and interaction.
- Mock-up and propose best practices.
- Perform FE and BE tasks
